Carl,

Please get with the water task force. They in coordination with Logistics can look at an alternative. Please make sure to coordinate with the state.

Respectfully,

Dominique Lenox
IMCORE Operations Section Chief, FEMA HQ
540-532-1092

Subject: RE: Immediate Action Needed Dorado Groundwater Contamination

This issue is continuing to heat up and EPA is working to sample and secure the site. However, this is a supply source that would be cut off and critical needs. We understand the area is the be energized within days, and water restored shortly thereafter, but our request for a water source there would be replace to the contaminated water that we need to close down and secure.

We are still requesting a source to be placed at that location, again, replace what we are working to take away.

We have arranged through FBI to deliver pallets of water there on Monday, but are looking for a better solution until water is restored.

Javier,
Please work with log to ensure potable water is accessible to the area discussed below.

Please see the message string below.

Our teams have observed people drawing (contaminated) water for drinking from a Superfund site. EPA is preparing warning signs to post there, but we are also asking for a water supply to be placed there.

Clearly this is a significant concern. We are trying to have signs made up for posting: the REOC received the language to be on these signs.
Carl/Steve: Is it possible to run this to FEMA/National Guard for a water truck to be placed there?

Buenas Tardes:

Our Team 2 was provided some additional information on other well locations at the Dorado NPL site. During their assessments they stopped by one of these locations. Citizens are bringing containers to drink from the wells. The fencing is not secure. I would think this needs immediate attention from the RPM but I will leave that to Incident Command and CEPD management as it is outside the scope of our assigned work.

I will provide some more details and photos later.

Subject: Update- Immediate Assessment Need -Hormigas Groundwater Plume & Dorado Groundwater Contamination

Hola:

Team 1 finished inspecting the wells at Hormigas Groundwater Contamination NPL Site. There are three wells. The wells are covered and secured with locks. The locks have not been compromised. There is a water line near the wells and a neighbor informed Weston that he took about 10 gallons of water from the water line which is supplied from a main water supply. Photos for both responses pending.

Team 1 consists of Don McLaughlin (OSC), Silvia Palomo (CIC), and Guillermo Lopez (Weston) with two CID escorts
Team 2 consists of Aarti Reddy (OSC), Wanda Ayala (CIC), and Hector Rodriguez (Weston) with two CID escorts

Buenos Dias:

Team 2 investigated the Dorado Groundwater Contamination NPL Site. There were not people or trucks accessing the wells. However, the gate is not secured and a pump pipe was misting. There were police in the area but they were blocking traffic for trucks cleaning the road. We will have photos later when reception is better to forward from the field.

Buenas Noches:

Please see the email below. Our teams will be visiting two CEPD NPL sites tomorrow for recon. Any assistance regarding these sites would be appreciated. We are just putting eyes on the situation since people are accessing your wells. We plan on leaving the Water Beach Club Hotel in Carolina at 8:30 AM if anyone is able to join our teams. If not, any information would be beneficial. Gracias

RPM for Dorado is Luis Santos; cell [REDACTED]
RPM for Hormigas is Adalberto Bosque; cell [REDACTED]
Brenda Reyes, Public Affairs in CEPD; cell [REDACTED]

Subject: Immediate Assessment Need - For 10-11-2017

There are reports that people are accessing the wells at groundwater NPL sites. Please send teams to investigate these reports. Exercise caution at these locations and it is not advised to interfere with people. Just need to get some eyes on the wells associated with the Site.
